Data Protection
Video Transcript

Thank you

[Beat Rudin]: Congratulations! You have reached the end of the course!

[Danielle Kaufmann]: In the first chapter, you learned why data protection is important and in what areas it plays a role. We paid particular attention to the legal sources that form the foundation for data protection.

[Beat Rudin]: The second chapter focused on the practical side of data protection: data processing, especially by public institutions. You learned about the principles that underlie data processing and what aspects require particular attention. We also discussed the significance of consent. Finally, you discovered how to ensure data protection if a third party is processing data on your behalf – and what that means for cloud services.

[Danielle Kaufmann]: Thank you very much for your participation in our course. We hope we were able to make the topic of data protection in your daily work life more accessible.
